Assignment #2:

Due: Sep. 14

Objective:

1. Be familiar and understand what is being studied in each discipline in computer science.
2. Get to know the requirements to get BS in CS at other universities and get clearer view on what CS is about.
3. Be able to design and represent a simple algorithm

Problem description:

1. Choose one of the disciplines in computer science and identify 3 universities (either local or national) that offer this discipline; then get a list of computer science courses from these universities, including the course description, required for the Bachelor of Science in your selected discipline.
2. Design an algorithm to perform addition of any two given positive numbers.
